Fatal Work Injuries in Ohio — 2017

Fatal work injuries totaled 174 in 2017 for Ohio, the U.S. Bureau of Labor Statistics reported today. Assistant Commissioner for Regional Operations Charlene Peiffer noted that the number of work-related fatalities in Ohio was up from the previous year. Fatal occupational injuries in the state have ranged from a high of 222 in 1999 to a low of 137 in 2009. (See [chart 1](#).)

Nationwide, a total of 5,147 fatal work injuries were recorded in 2017, down slightly from the 5,190 fatal injuries reported in 2016, according to the results from the Census of Fatal Occupational Injuries (CFOI) program.

Chart 1. Total fatal occupational injuries, Ohio, 2008–2017

SOURCE: U.S. Bureau of Labor Statistics.

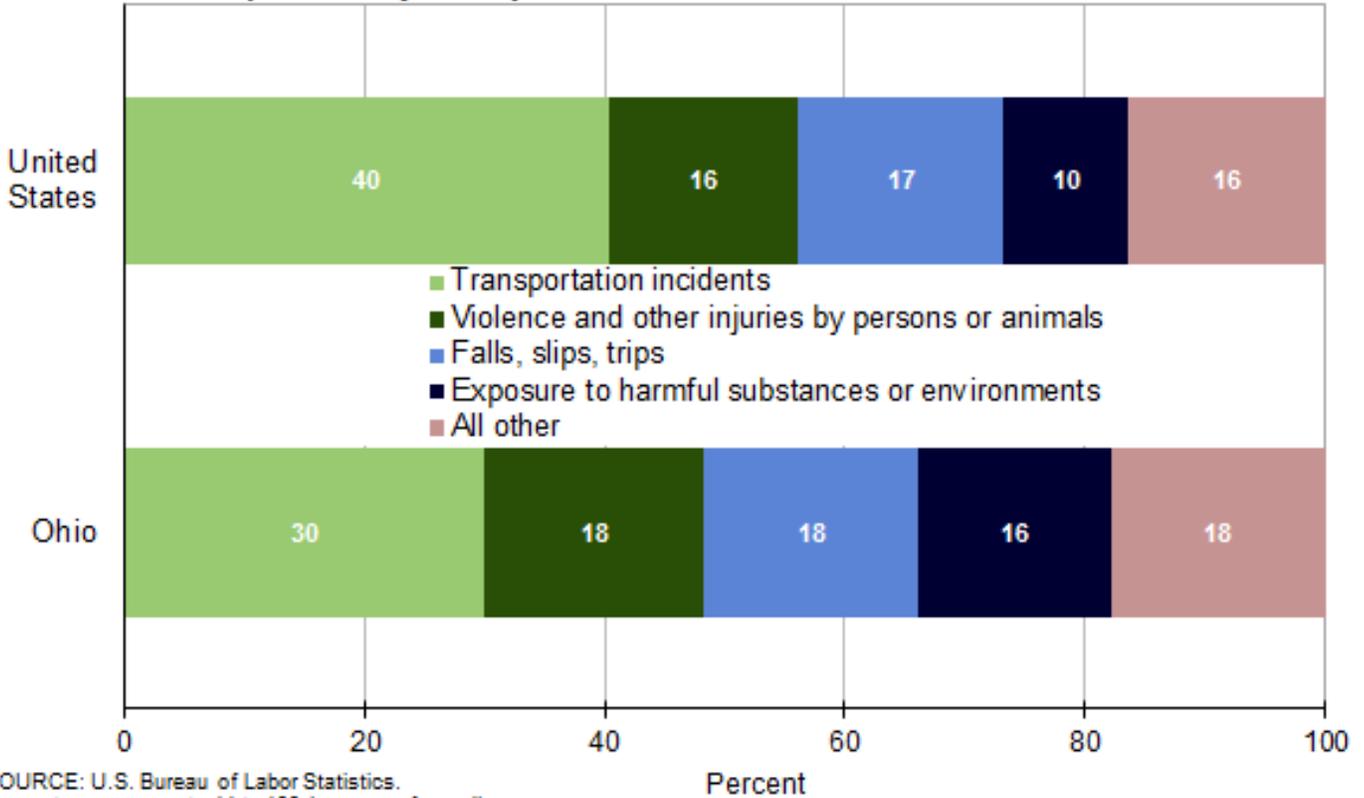

Type of incident

In Ohio, transportation incidents resulted in 52 fatal work injuries. Violence and other injuries by persons or animals accounted for 32 fatalities; falls, slips, or trips resulted in 31 fatal work injuries. These three major categories accounted for 66 percent of all workplace fatalities in the state. (See [table 1](#).) Compared to 2016, the number of worker deaths in each of these three categories was little changed.

Exposure to harmful substances or environments resulted in 28 fatal work injuries and contact with objects or equipment accounted for 24 fatalities. Over the year, the number of worker deaths from exposure to harmful substances or environments increased from 25, while worker fatalities due to contact with objects or equipment was unchanged.

Nationally, transportation incidents were the most frequent fatal workplace event in 2017, accounting for 40 percent of fatal work injuries. Falls, slips, or trips was the second-most frequent type of event (17 percent), followed by violence and other injuries by persons or animals (16 percent) and contact with objects and equipment (14 percent).

Chart 2. Fatal occupational injuries by selected event, United States and Ohio, 2017

Industry

The private transportation and warehousing industry had the highest number of fatalities in Ohio with 36, up from 32 in the previous year. (See table 2.) Transportation incidents resulted in 17 of the 36 fatalities in the industry. The private construction industry had 32 workplace fatalities, up from 23 in the previous year. The specialty trade contractors sector accounted for 20 of the 32 workplace fatalities in the construction industry.

Occupation

The transportation and material moving occupational group had the highest number of workplace fatalities with 50. (See table 3.) Heavy and tractor-trailer truck drivers suffered 33 of the work-related deaths within the transportation and material moving group. The construction and extraction occupational group had the second highest number of workplace fatalities with 29, followed by production occupations with 15. Construction trades workers accounted for 25 of the 29 fatalities within the construction and extraction group. Metal workers and plastic workers accounted for 5 of the 15 production worker fatalities.

Additional highlights

- Men accounted for 87 percent of the work-related fatalities in Ohio, compared to the 93-percent national share. (See table 4.) Transportation incidents made up 31 percent of the fatalities for men in Ohio.

- White non-Hispanics accounted for 79 percent of those who died from a workplace injury. Nationwide, this group accounted for 67 percent of work-related deaths.
- Workers 25-54 years old accounted for 54 percent of the state's work-related fatalities in 2017, compared to 55 percent of on-the-job fatalities nationally.
- Of the 174 fatally-injured workers in Ohio, 85 percent worked for wages and salaries; the remainder were self-employed. The most frequent fatal event for wage and salary workers was transportation incidents; for self-employed workers, the most frequent fatal event was violence and other injuries by persons or animals.

Technical Note

Background of the program. The Census of Fatal Occupational Injuries (CFOI), part of the BLS Occupational Safety and Health Statistics (OSHS) program, compiles a count of all fatal work injuries occurring in the U.S. during the calendar year. The CFOI program uses diverse state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This ensures counts are as complete and accurate as possible. For the 2017 national data, over 23,400 unique source documents were reviewed as part of the data collection process. For technical information and definitions for CFOI, please go to the BLS Handbook of Methods on the BLS website at www.bls.gov/pub/hom/cfoi/home.htm.

Federal/State agency coverage. The CFOI includes data for all fatal work injuries, even those that may be outside the scope of other agencies or regulatory coverage. Thus, any comparison between the BLS fatality census counts and those released by other agencies should take into account the different coverage requirements and definitions being used by each agency. More on the scope of CFOI can be found at www.bls.gov/iif/cfoiscope.htm and www.bls.gov/pub/hom/cfoi/concepts.htm.

Acknowledgments. BLS thanks the Ohio BWC Division of Safety and Hygiene for their efforts in collecting accurate, comprehensive, and useful data on fatal work injuries. BLS also appreciates the efforts of all federal, state, local, and private sector entities that provided source documents used to identify fatal work injuries. Among these agencies are the Occupational Safety and Health Administration; the National Transportation Safety Board; the U.S. Coast Guard; the Mine Safety and Health Administration; the Office of Workers' Compensation Programs (Federal Employees' Compensation and Longshore and Harbor Workers' Compensation divisions); the Federal Railroad Administration; the National Highway Traffic Safety Administration; state vital statistics registrars, coroners, and medical examiners; state departments of health, labor, and industrial relations and workers' compensation agencies; state and local police departments; and state farm bureaus.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Footnotes:

(1) Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

Crane and tower operators.....	--	1	1
Laborers and material movers, hand.....	6	6	3
Laborers and freight, stock, and material movers, hand	5	6	3

Footnotes:

(1) Occupation data are based on the Standard Occupational Classification system, 2010.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

Table 4. Fatal occupational injuries by selected demographic characteristics, Ohio, 2016–17

Worker characteristics	2016	2017	
	Number	Number	Percent
Total	164	174	100
