### Kansas City Area Employment – November 2014

Total nonfarm employment for the Kansas City, Mo.-Kan. Metropolitan Statistical Area (MSA) stood at 1,027,800 in November 2014, up 10,300 or 1.0 percent from November 2013, the U.S. Bureau of Labor Statistics reported today. During the same period, nonfarm employment nationwide rose 2.0 percent. Regional Commissioner Stanley W. Suchman noted that the Kansas City metropolitan area has registered over-the-year job gains each month since October 2010.

**Chart 1. Total nonfarm employment, over-the-year net change in the Kansas City metropolitan area and its components, November 2011–November 2014**

Net change (in thousands)

Source: U.S. Bureau of Labor Statistics.

The Kansas City metropolitan area is comprised of two separately identifiable employment centers—the Missouri portion and the Kansas portion of the MSA. The Missouri portion, which had 55 percent of the area’s workforce, accounted for over three-fourths of the MSA’s employment growth with the addition of 8,400 jobs (1.5 percent) from November 2013 to November 2014. The Kansas portion, with 45 percent of the area’s

workforce, gained 1,900 jobs (0.4 percent) over the year. (See [chart 1](#) and [table 1](#); the Technical Note at the end of this release contains metropolitan area definitions. Data in this release are not seasonally adjusted; accordingly, analysis is based on over-the-year comparisons.)

Three supersectors in the Kansas City metropolitan area added more than 1,000 jobs from November 2013 to November 2014. Employment in professional and business services expanded by 6,100, as the Kansas portion of the MSA added 3,800 jobs and the Missouri portion gained 2,300 jobs. This supersector's rate of local job growth, at 3.7 percent, compared to the national rate of 3.6 percent. Education and health services employment rose by 2,900, led by the addition of 2,400 jobs on the Missouri side of the metropolitan area. Locally, the rate of job growth in the education and health services supersector was 2.1 percent, similar to the national gain of 2.0 percent. Employment in leisure and hospitality expanded by 1,900 from November 2013, with the Missouri portion of the MSA gaining 4,800 jobs while the Kansas portion lost 2,900 jobs. The metropolitan area's 2.0-percent rate of job growth was slower than the 2.6-percent national rate for this supersector.

In contrast, one supersector in the Kansas City area experienced employment losses of more than 1,000 jobs over the year. Trade, transportation, and utilities shed 1,200 jobs, with losses equally distributed between the two portions of the metropolitan area. Locally, trade, transportation, and utilities employment was down 0.6 percent while nationally it was up 2.0 percent.

### Technical Note

This release presents nonfarm payroll employment estimates from the Current Employment Statistics (CES) program. The CES survey is a Federal-State cooperative endeavor between State employment security agencies and the Bureau of Labor Statistics.

**Definitions.** Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period which includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2012 version of the North American Industry Classification System.

**Method of estimation.** The employment data are estimated using a "link relative" technique in which a ratio (link relative) of current-month employment to that of the previous month is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are obtained by multiplying the estimates for the previous month by these ratios. Small-domain models are used as the official estimators for approximately 39 percent of CES published series which have insufficient sample for direct sample-based estimates.

**Annual revisions.** Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports which are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

**Reliability of the estimates.** The estimates presented in this release are based on sample survey, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability--that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data are also subject to nonsampling errors, such as those which can be

introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the special estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding.

**Employment estimates.** Measures of sampling error for state CES data at the supersector level are available on the BLS Web site at [www.bls.gov/sae/790stderr.htm](http://www.bls.gov/sae/790stderr.htm). Information on recent benchmark revisions for states is available at [www.bls.gov/sae/](http://www.bls.gov/sae/).

**Area definitions.** The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget on December 1, 2009. A detailed list of the geographic definitions is available at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm).

**The Kansas City, Mo.-Kan. Metropolitan Statistical Area (MSA)** includes Bates, Caldwell, Cass, Clay, Clinton, Jackson, Lafayette, Platte, and Ray Counties in Missouri; Franklin, Johnson, Leavenworth, Linn, Miami, and Wyandotte Counties in Kansas.

**The Kansas City, Mo., portion** includes Bates, Caldwell, Cass, Clay, Clinton, Jackson, Lafayette, Platte, and Ray Counties in Missouri.

**The Kansas City, Kan., portion** includes Franklin, Johnson, Leavenworth, Linn, Miami, and Wyandotte Counties in Kansas.

### **Additional information**

More complete information on the technical procedures used to develop these estimates and additional data appear in *Employment and Earnings*, which is available online at [www.bls.gov/opub/ee/home.htm](http://www.bls.gov/opub/ee/home.htm). Industry employment data for states and metropolitan areas from the Current Employment Statistics program are also available in the above mentioned news releases and from the Internet at [www.bls.gov/sae/](http://www.bls.gov/sae/).

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 800-877-8339.
